Personal Statement

Senior Full-Stack Developer with proven expertise architecting and delivering production-grade web and mobile applications using React, React Native, Vue.js, and Angular with .NET Core and Node.js backends. Currently leading frontend and UX development at ABL Health, where I successfully launched a mobile application for national smoking cessation services and, as UX Lead, redesigned internal operational systems based on extensive staff consultation, streamlining workflows to significantly reduce processing time and operational costs across the national rollout. I combine technical leadership in modular architecture, RESTful API design, and CI/CD implementation with exceptional UX design capabilities. This enables me to deliver WCAG 2.1-compliant, high-performance applications that solve real business problems while seamlessly bridging the gap between technical development and meeting user needs.

Professional Competencies

UX/UI Design & Research • Agile Methodologies • Technical Leadership • Code Review • Accessibility (WCAG 2.1) • Project Management • Cross-functional Collaboration • Technical Documentation

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS, SQL, C#

Frontend Frameworks: React, React Native, Vue.js, Angular

Backend & APIs: Node.js, Express, ASP.NET Core, RESTful APIs

Databases: PostgreSQL, SQL Server, MongoDB

State Management: Redux

Testing: Jest, Cypress

Styling & UI: Tailwind CSS, Bootstrap, NativeWind

Tools & DevOps: Git/GitHub, Azure, CI/CD Pipelines, Jira

Design & Prototyping: Figma, Adobe XD, Adobe Creative Cloud

ORMs: Prisma, Drizzle

💻 Technical Portfolio | evenordinstorm.com

4 Production-grade full-stack applications:

Stublt mobile app & Pulse staff system: React Native, React, Redux, Node.js, Express, Drizzle, PostgreSQL

Mobile SaaS app & SEO website: React Native, Next.js, Redux, Node.js, Express, Prisma, PostgreSQL

Social Media Platform: Vue.js, .NET Core, Express, SQL Server

eCommerce Store: MEAN Stack (MongoDB, Express, Angular, Node.js)

💼 Professional Experience

Frontend & UX Lead at ABL Health, Durham (hybrid)

Jan 2025 - Present

- Architected and led the full-stack development of React Native mobile app and React web portal deployed nationally in smoking cessation services, serving thousands of users across the UK healthcare system, and currently leading UX design and development for weight management app (launching 2026) to create a comprehensive healthcare suite
- Spearheaded complete redesign of internal operational systems through bespoke software, delivering measurable staff efficiency improvements and operational cost savings across the national rollout
- Established technical standards including code review processes, Git workflows, and automated testing frameworks (Jest/Cypress)
- Led cross-functional UX team implementing gamification, behavioural science principles, and WCAG 2.1 AA accessibility compliance through agile sprints, stakeholder demos, and user testing, continuously delivering bug fixes and feature enhancements

Technical stack:

React Native, React, Node.js, Express, PostgreSQL, Drizzle, Redux, Jest, Cypress, Azure DevOps, Git

Instructional Designer at British Dyslexia Association (remote)

Oct 2022 - Dec 2024

- Administered and optimised Learning Management System, troubleshooting technical issues, managing user authentication, and implementing system integrations to create optimised workflows, while developing accessible e-learning content for neurodiverse learners
- Provided technical support to hundreds of internal and external users, resolving complex access issues and creating comprehensive documentation that decreased repeat queries
- Led digital marketing campaigns including brand design, email automation workflows, and analytics tracking

Design Executive at The Opportunity Group (remote)

May - July 2022

- Created custom-branded presentations for client organisations across varied industries, translating complex compliance and training requirements into engaging visual materials for workforce education, refined through iterative stakeholder collaboration
- Produced data visualizations and infographics that simplified technical information for non-technical audiences, improving client comprehension and engagement

Digital Marketer at MYBE Awards, Durham

Nov 2020 - Sept 2021

- Led end-to-end UX research for mobile app redesign, conducting user interviews, creating wireframes, and developing interactive prototypes
- Collaborated with development team on technical specifications, user flows, and API requirements, ensuring seamless design-to-development handoff
- Managed digital analytics (Google Analytics, social media insights) to inform product decisions and increase client acquisition
- Mentored junior design team on design principles, prototyping tools, and user-centered design methodologies

Education

Graphic Design Apprenticeship at Whites Print, Durham

Jul 2018 - Jan 2020

- Coordinated client requirements gathering and project specifications for print production
- Produced design assets and managed large-scale print runs while maintaining strict quality standards
